

1481

OFFICE CENTER

THE PROJECT

Building 1481 is a superb commercial and office space development, which has been constructed with prime materials and endowed with high-end finishing and state-of-the-art equipment. The property includes granite-flamed finish, half-mirrored glass, and a total of 304 splendid stainless steel balusters placed in rows around the third and roof floors of the building.

All of the offices in Building 1481 feature deluxe wooden doors, First Choice ceramic flooring, Gibson board ceilings, double-glazing windows, and as many as three layers of wall paint. Kitchen interiors are equipped with sinks and top of the line Lamaika wooden cabinets, while WCs are furnished with wall-hung toilet seats and small sinks. Each of the individual rooms in 1481 are provided with their very own VRV air-conditioning systems.

Other standard building features comprise four Mitsulift guest elevators and a local service elevator, in addition to two generators that power the structure around the clock.
